DVLA Licence Check Code

Since the introduction of new legislation for Driving Licences in the UK, the counterpart is no longer relevant and holds no legal status. This means that we are now required to complete an electronic check of all driver's licences via the DVLA Website.

To ensure collection of all rental vehicles goes as smoothly as possible, we aim to conduct all checks in advance of hire commencing.

Steps to Create Your DVLA Licence Check Code

To allow us to carry out these electronic DVLA Licence Checks, you will need to complete the following steps:

- Visit – <http://www.viewdrivingrecord.service.gov.uk/driving-record/licence-number>
- Enter the required information into the fields and click "I agree"
- Click "View Now"
- In the top right hand corner of the "View your driving licence information" screen click – "Share your licence"
- On the last screen click "Create a Code"

Once you have completed these steps email us the following information:

- Your unique licence check code (copy and paste if possible as it is case sensitive)
- The last 8 characters of your driving licence number

Once we have received your DVLA Licence Check Code and the licence numbers as indicated above, we will confirm verification has been carried out.
